

# ICMAT 2017

9th International Conference on  
Materials for Advanced Technologies

18 - 23 June 2017 | Suntec Singapore

## Call for Participation

[icmat2017.mrs.org.sg](http://icmat2017.mrs.org.sg)

The International Conference on Materials for Advanced Technologies, or more commonly known as ICMAT, is a major biennial event organized by The Materials Research Society of Singapore (MRS-S).

The first 8 conferences in this biennial ICMAT series attracted more than 20,000 participants including 22 Nobel Laureates. The upcoming 9th conference will have 30 technical symposia, 10 plenary lectures, 4 theme lectures and several invited, contributed and poster presentations with the expected participation of 2,500 delegates from about 50 countries.

With the confirmed participation of Nobel Laureates Sir Fraser Stoddart (2016), Hiroshi Amano (2014) and Kostya Noboselov (2010) and several other distinguished scientists, we expect the conference will be of great interest to the materials research community in the region and worldwide.

For more information on the conference and how you can participate, please visit: <http://icmat2017.mrs.org.sg>

We look forward to receiving your abstracts and look forward to welcoming you to ICMAT 2017, to feel the dynamism and share your ideas in advancing materials research.
